This Resource Guide has been updated and provided for your convenience by Lassen County Public Health with the assistance of many community partners. Funding for this guide was provided by the Lassen County Public Pandemic Influenza Program, a program promoting influenza prevention and education throughout our community.

Lassen County Public Health Emergency Preparedness Office continues to promote influenza education and preparedness in Lassen County by offering Annual Flu Vaccinations, providing hand washing and flu prevention education to our local schools and community groups and promoting flu education and prevention with our local providers.

Visit our Emergency Preparedness Website: www.norcalbt.com/CountyLassen/ and take our “Get Ready Stay Ready Challenge”

For more information on influenza, preparing for a pandemic, and emergency kits go to:
www.pandemicflu.gov (U.S. Department of Health and Human Services)  
www.cdc.gov/flu (Centers for Disease Control and Prevention)  
www.prepare.org (Red Cross)  
www.oes.ca.gov (Governor’s Office of Emergency Services)  
www.getimmunizedca.org (California Department of Health Services, Immunization Branch)

Lassen County Public Health would like to thank all partners that assisted in the creation and update of this resource guide.

A special thanks to R.W. McBride Studios for generously donating the cover art work. An original oil on canvas painting of Walker Lake by R.W. McBride.

Lassen County Public Health is in gratitude to the Washington Department of Health for the creation of the Emergency Resource Guide Sheets used in this directory.

7. ANIMAL HEALTH

LASSEN COUNTY ANIMAL SHELTER (530) 257-9200
472-000 Johnstonville Road North
Susanville, CA 96130
Services: We emphasize public awareness through education of the proper care and control of all animals, and the Enforcement of the Animal Laws, within the State of California, and the County Ordinances here in Lassen County
Hours: 9 AM - 3 PM, Mon - Friday 9 AM - 2 PM, Sat. 10 AM - 2 PM. Closed Sundays and County holidays.
For after hour help call the County Animal Control Officer at (530) 257-0488, the City Animal Control Officer at (530) 257-5605, the Lassen County Sheriffs Department at (530) 257-6121, or the Susanville Police Department at (530) 257-2171.
Donations: We now have a separate trust account for Animal Shelter use only. This money is used for the animals and animal related items only. We buy puppy vaccinations, treat un-adoptable animals to make them adoptable, and various other animal related needs. A donation may be made by coming to the Animal Shelter in person or by sending a check or money order, made payable to Animal Shelter Trust/Donation to Lassen County Animal Shelter, 707 Nevada Street, Susanville, CA 96130. Please mark all donations clearly as such. We also have a wish-list that includes towels and blankets (desperately needed), canned and dry dog and puppy food, a rodent-proof storage unit 10' x 10 ' or larger (a truck box would be great!), dog beds, dog toys, and rawhide chews.

LASSEN HUMANE SOCIETY (530) 257-4555
8. CHILD ABUSE AND FAMILY VIOLENCE

LASSEN COUNTY FAMILY & CHILDREN PROTECTIVE SERVICES (530) 251-8277
1445 Paul Bunyan Road
Susanville, CA 96130

Why do children get taken into protective custody? A child may be taken into protective custody when a peace officer, probation officer or social worker reasonably believes the child’s safety is in danger and the protection of juvenile dependency court is needed. One of the following conditions must appear to exist:

1. When a parent or person who has custody fails to provide proper care or supervision;
2. When a child is not given adequate food, shelter (home), or clothing;
3. When a child is physically dangerous;
4. When a child’s home is dangerous because of neglect, cruelty or physical or sexual abuse, by a parent, guardian or someone else in the home.

Where does a child go after taken into protective services? Children go into children’s shelters or a licensed foster home. The parent is told where the child is unless the social worker believes it would be dangerous to the child. The parent has the right to apply to juvenile court for review within 24 hours if the social worker won’t tell where the child is.

When will a child be released from protective services? The child may be released immediately. The social worker assigned to the child’s case will review the reports and decide what is safe for the child at the time. If the child is not released, the child may be temporarily placed in:

1. The home of the other parent
2. The home of the responsible parent.
3. A foster home or similar placement.
COURT APPOINTED SPECIAL ADVOCACY PROGRAM (CASA)  (530) 257-4599
1306 Riverside Dr. / P.O. Box 710
Susanville, CA 96130

What is CASA? CASA volunteers are Court Appointed Special Advocates for children and are trained community
volunteers appointed by a judge to speak up for abused and neglected children in court.

What does a CASA Volunteer Do? When a CASA volunteer is appointed to a child’s case, he or she is responsible
for taking the time to find out as much as possible about that child. CASA volunteers search for information.
They review records. Interview parents. Talk to teachers, neighbors, and - most important – support the child.

LASSEN FAMILY SERVICES  (530) 257-4599

parents, child care providers, agency personnel and the general public. Programs include Child Care Re-
source and Referral, and subsidized child care services.

Child Care Referrals: brochures and information on parent and child issues, and referrals to licensed providers
with child care openings are available.

Licensing Assistance: Staff will provide information on licensing requirements, assistance in completion of the
application materials and provision of resources in the administration and daily operation of a child care program. A
bimonthly Family Day Care Orientation class is also offered.

Car Seats: Seats are available on a six-month loan for a deposit of $10.00.

Lending Library: The resource lending library consists of toys, books, tapes and records available to parents, pro-
viders and the general public. Items may be borrowed for a two-week period at no cost.

The library is open from 10 AM - 3 PM, Mon - Fri.

Newsletters and Workshops: Newsletters, including information on nutrition, activities, advocacy, local events,
and other items of interest to families are distributed quarterly. Workshops are offered on a variety of subjects as
needs are identified, including Family Day Care orientations on a bimonthly basis.

Subsidized Child Care Programs: Subsidized child care for income-eligible families is available through Cal
WORKS, Latchkey and Block Grant Programs. A special child care program for 3 and 4 year olds is also available
to qualifying families.
9. CHILD CARE

C.A.R.E. PROGRAM
Lassen Community College
Highway 139
Susanville, CA 96130
Services: Assists single parents with child care. The CARE Program is a state funded program providing support to re-entry students who are CalWORKS and AFDC single heads of household wanting to attend college. The program provides off-campus child care reimbursement for infants and children under the age of 14 years.
Eligibility: Lassen Community College students who meet eligibility guidelines.

PATHWAYS TO CHILD & FAMILY EXCELLENCE  
Susanville (530) 251-2997  Big Valley (530) 294-5419
2005 Main Street
Susanville, CA 96130
Services: The Lassen County 0to5 Home Visiting Program is designed to help residents with children 0 to 5 become more purposeful parents. This program is available to pregnant women and parents, both mothers and fathers who are residents of Lassen County and who have a child between the ages of birth to five years old. By building on strengths the parents already have, this program will cultivate nurturing parent-child relationships and empathetic child guidance. The Parents As Teacher’s curriculum (PAT) is designed for pregnant, families and children ages birth to 5 years old. The PAT curriculum is brought to the family’s home via a PAT-Parent Educator and Healthy Families America certified Home Visitor. The Home Visiting Program is funded by FIRST-5 Lassen. The Parent Educators are staffed through PATHWAYS. The program utilizes the Parent Educators in order to provide services to families that cater to each families individually and responds to all their needs that may be met by participating County Agencies. ASQ-3 developmental screening & ASQ-SE behavioral screenings for children ages 1 month to 5 and a half years are also provided by PATHWAYS staff members. Supervised Visitation services are provided on site by Certified Visitation Monitors for $23.00 per hour.

LASSEN CHILD & FAMILY RESOURCES

(530) 257-9781

336 Alexander Avenue
Susanville, CA 96130

Contact: Lassen child and family resources for a comprehensive list of childcare centers and in family childcare homes.

Lassen Child and Family Resources offers a variety of information and resources to meet needs of children, parents, child care providers, agency personnel and the general public. Programs include Child Care Resource and Referral, and subsidized child care services.

Child Care Referrals: Brochures and information on parent and child issues, and referrals to licensed providers with child care openings are available.

Licensing Assistance: Staff will provide information on licensing requirements, assistance in completion of the application materials and provision of resources in the administration and daily operation of a child care program. As needed Family Day Care Orientation classes are also offered.

Lending Library: The resource lending library consists of toys, books, video and DVD games available to parents, providers and the general public. Items may be borrowed for a two-week period at no cost.

Car Seats: Seats are available on a six-month loan for a deposit of $10.00.

Newsletters and Workshops: Newsletters, including information on nutrition, activities, advocacy, local events, and other items of interest to families are distributed quarterly. Workshops are offered on a variety of subjects as needs are identified, including Family Day Care orientations on a bimonthly basis.

Subsidized Child Care Programs: Subsidized child care for income-eligible families is available through Cal Works, Latchkey and Block Grant Programs.
LASSEN COUNTY OFFICE OF EDUCATION  (530) 257-2196
Infant and Toddler Program
472-013 Johnstonville Road
Susanville, CA 96130

A teen magazine and book section is available as well as an adolescent Health Information Center. Computers and Internet are popular and always in use. Web site: www.infopeople.org/Susanville/

Local schools and churches provide many programs for youth in our community.
How to Use 9-1-1

Call 9-1-1 only to report a life-threatening situation requiring police, medical or fire emergency assistance. Do not call 9-1-1 unnecessarily.
9-1-1 lines must be kept open for people with true emergencies.

When to call 9-1-1

- To get help for someone who is hurt. For example:
  - If someone is seriously injured.
  - If you see someone hurt in an accident.
- If you see someone acting suspiciously, stealing, or breaking into a home or building.
- If you smell smoke or see a fire.
- If you see people fighting and hurting each other.
- If you see someone being robbed or beaten.
- If you believe emergency assistance may be needed but are not sure, call 9-1-1 and describe the situation.
- If you call 9-1-1 by accident, don’t hang up. Explain what happened to the 9-1-1 operator.

When not to call 9-1-1

In the event of a natural disaster or emergency, minimize your calls to 9-1-1 unless it is a life-threatening police, medical or fire emergency. The following guide should help you determine when it is appropriate to call 9-1-1 in a disaster.

- Never call 9-1-1 as a joke.
- Never call 9-1-1 to ask for information.
- Never call just to see if 9-1-1 is working.
- Stay off the telephone unless you have a critical need to make a telephone call.
- Do not call 9-1-1 unless you need emergency response from police, fire or emergency medical personnel.
- If you experience other types of problems not related to these emergency services, call the appropriate telephone number for those services.

Other emergency phone tips

- If you pick up your telephone to make a call and do not hear a dial tone, do not hang up. Simply wait a few seconds, and you will get a dial tone and be able to make your call.
- Do you have an out-of-area contact? In an emergency, local phone lines could be jammed. If you have a friend or relative to call long distance, you should be able to get through. Your family can leave messages for each other and you can let people know you’re okay.

What to say when you call 9-1-1

- Tell the person what is wrong.
- Tell the person your name, address and telephone number.
- Do not hang up until they tell you that you should; they may have to ask you more questions.

Teach your children the correct use of 9-1-1

- Parents should use the information on this sheet to talk to children about how and when to use 9-1-1. Knowing the right thing to do can save lives.

Keep phone lines clear during emergencies

- During emergencies, telephone services become overloaded. You can help keep service available for those who need it most by making only calls that are critical. Limit fax machine and computer use as well; their use also ties up phone lines.
Helping Children After a Disaster

It’s important to remember some children may never show distress, while others may not give evidence of being upset for several weeks or even months after an emergency. Other children may not show a change in behavior, but may still need your help.

Children exhibit the following behaviors after a disaster:

- Be upset over the loss of a favorite toy or possession that is important to them.
- Change from being quiet, obedient and caring to loud, noisy and aggressive, or change from being outgoing to shy and afraid.
- Develop night-time fears (nightmares, fear of the dark or sleeping alone).
- Be afraid the event will reoccur.
- Become easily upset.
- Lose trust in adults. (After all, their adults were not able to control the disaster.)
- Revert to younger behavior (bed-wetting, thumb-sucking).
- Want to stay close to parents. Refuse to go to school or daycare.
- Feel they caused the disaster because of something they said or did.
- Become afraid of wind, rain or sudden loud noises.
- Have symptoms of illness, such as headaches, vomiting or fever.
- Worry about where they and their family will live.

Things parents can do to help their children

- Talk with children about how they are feeling. Assure them that it’s okay to have those feelings.
- Help children learn to use words that express their feelings, such as “happy,” “sad,” or “angry.”
- Children should not be expected to be brave or tough. Tell them it’s okay to cry.
- Don’t give children more information than they can handle about the disaster.
- Assure fearful children you will be there to care for them; consistently reassure them.
- Go back to former routines as soon as possible. Maintain a regular schedule for the children.
- Reassure children that the disaster was not their fault.
- Let children have some control, such as choosing clothing or what meal to have for dinner.
- Re-establish contact with extended family.
- Help your children learn to trust adults again by keeping promises you make.
- Help your children regain faith in the future by making plans.
- Get needed health care as soon as possible.
- Spend extra time with your children at bedtime.
- Make sure children eat healthy meals and get enough rest.
- Allow special privileges for a short period of time, such as leaving the light on when they go to bed.
- Find ways to emphasize to your children that you love them.
- Allow children time to grieve losses.
- Develop positive anniversary activities to commemorate the event. These may bring tears, but they are also a time to celebrate survival and the ability to get back to a normal life.
**Carbon Monoxide Safety**

Hundreds of people die accidentally every year from carbon monoxide poisoning caused by appliances that are not used properly or that are malfunctioning. Learn how to protect yourself and your family.

### If the power goes out:
- **ONLY** use a generator outdoors and far from open windows and vents.
- **NEVER** use a generator indoors, in garages or carports.
- **NEVER** cook or heat inside on a charcoal or gas grill.

### What is carbon monoxide?
Carbon monoxide is a poisonous gas that cannot be seen or smelled and can kill a person in minutes. Carbon monoxide is produced whenever any fuel such as gas, oil, kerosene, wood, or charcoal is burned. Carbon monoxide can build up so quickly that victims are overcome before they can get help.

### Once inhaled, carbon monoxide:
- Can cause permanent brain damage.
- Can cause chest pains or heart attacks in people with heart disease.

### What are the symptoms of carbon monoxide poisoning?
- Headache
- Weakness
- Dizziness
- Confusion
- Fatigue
- Nausea

### How can I prevent carbon monoxide poisoning?
- Never burn charcoal inside homes, tents, campers, vans, trucks, garages, or mobile homes.
- Do not burn charcoal in the fireplace in your home.
- Never use gasoline-powered equipment indoors.
- Never use a gas oven to heat your home, even for a short time.
- Never idle a car in a garage, even when the garage door is open.
- Never sleep in a room while using an unvented gas or kerosene heater.
- Make sure that chimneys and flues are in good condition and are not blocked.
- Carbon monoxide warning devices may provide additional protection, but should not replace the other prevention steps.

### If you suspect someone has been poisoned by carbon monoxide:
- Move the person to a place with fresh air immediately.
- Take the person to an emergency room and tell them that you suspect carbon monoxide poisoning.
Out-of-Area Contacts

If you are separated from your loved ones when disaster strikes, you will need a way to find out where they are. The stress of the event may make it difficult to remember even routine information, like phone numbers. Every household member should have an out-of-area contact card in a wallet, purse or backpack at all times.

Things to do before disaster strikes

- Ask an out-of-area family member or friend to be your contact person. This person should live at least 100 miles away from you. It may be difficult to make local calls because large numbers of people may be using the phone lines at the same time. However, you should be able to make long distance calls.
- Make small cards with the contact person’s name and phone number for all family members to carry in their wallets, purses or backpacks.
- Keep a phone that does not require electricity. Cordless phones use electricity—if the power is out, they will not work!

Contacting loved ones after disasters

- All household members should call the out-of-area contact. The contact person will collect information about each family member, where they are and how to contact them.
- You may be able to send text messages to your loved ones on your cell phone. Keep messages short.
- Make sure the handsets to your phones are hung up—during events such as earthquakes handsets can get knocked off their bases. When large numbers of phones are off-the-hook, local phone service may stop working correctly.
- You should be able to use a pay phone if your home phone does not work. Pay phones are part of the emergency services network, and are a priority to be restored to service. Tape the coins needed to use a pay phone to your out-of-area contact card.

Out-of-area wallet contact card

Make copies of this card for all family members. Have each person add your family’s contact information and place the cards in their wallet or purse.

(Cut out the card image, fold over to fit into a wallet.)
Getting Medicine During a Public Health Emergency

The Strategic National Stockpile is a federal government program that provides medication and medical supplies to states during an emergency.

When help is needed fast

If a disease outbreak, bioterrorism attack or natural disaster happens in California, thousands—possibly millions—of people will need medical attention to treat or prevent the spread of disease. Local medical supplies and medications will be used up quickly during such a public health emergency.

The Strategic National Stockpile (SNS) helps meet the need for additional supplies by quickly delivering large quantities of critical emergency medicines and supplies to states that request them.

In the event of a disaster, outbreak or attack, our Governor will ask the federal government to send SNS shipments to California. Once help is approved, the SNS will fill the request from storage facilities strategically located around the country. Supplies can be delivered to any state within 12 hours of the request.

Depending on the type of emergency, the SNS will deliver antibiotics, chemical antidotes, antitoxins or other medical or surgical items. Additional drugs and/or medical supplies can be supplied within the following 24 to 36 hours.

When SNS shipments are received, Californias emergency response workers will immediately deliver the supplies and medications directly to the communities that need them.

Finding medication during an emergency

- Cities and towns in California will set up emergency medication centers (also known as points of dispensing sites or PODS) where people can pick up the emergency medications or receive vaccinations. Medication centers will be located in large public buildings such as schools, arenas or churches in several geographic areas to minimize the amount of time people need to travel to reach them.

   Local public health agencies will announce when medication centers will open, where to find them, how to get there, what to bring and what to expect. You will be able to get this important information from sources that include:

   - Television and radio news; newspapers.
   - State and local public health and emergency management Web sites.
   - Community, civic and religious organizations.

   Local governments are responsible for determining the location of medication centers in their areas. In many cases these sites will not be made public until an emergency occurs. Not all medication center sites will be used for every emergency, so it will be important to check the resources listed above for current information in the event of an emergency.

At the medication center

- If medication centers are opened to distribute medicine from the SNS in an emergency, there will be no charge to the public.

- Trained staff will be available to assist you at the medication center.

- The process will be simple.

- Depending on the type of emergency, one person may be able to pick up medications for a household or group.

- Check the resources listed above for current information in the event of an emergency.
Household Fires

Fires in homes are most often caused by cooking accidents, smoking or unsafe use of woodstoves or space heaters. Here are some things you can do to avoid a home fire or protect yourself during a fire.

Protecting against fires

- Install smoke detectors in or near all sleeping areas and on every level of your home, including the basement. Check smoke detectors on a regular basis and replace the batteries twice yearly.
- Have A-B-C type fire extinguishers. Teach family members how to use them.
- Know the location of all exits including windows. If you live in an apartment, count the number of doorways between your apartment and the two nearest exits.
- Know two ways out of every room in case smoke or flames block your primary exit.
- Choose a meeting place outside the home.
- Have an escape plan and practice it with your family. This will help ensure you can get out quickly when there is no time for mistakes.
- Keep folding or chain style ladders stored in each upstairs bedroom.
- Use alternative heat sources, such as woodstoves or space heaters, safely:
  - Never use gas ovens, gas ranges, barbecues, or most portable or propane heaters for indoor heating.
  - Before using an alternative heat source, read the manufacturer’s instructions.

If fire strikes

- If there is a fire — evacuate. Do not go back inside. Call 9-1-1 from a neighbor's house.
- Never use water on an electrical fire.
- Smother oil and grease fires in the kitchen with baking soda or salt, or put a lid over the flame if it is burning in a pan.
- If caught in smoke — drop to your hands and knees and crawl; breathe shallowly through your nose and use your blouse, shirt or jacket as a filter.
- If you must move through flames — hold your breath, move quickly, cover your head and hair, keep your head down and close your eyes as much as possible.
- If your clothes catch fire, “stop, drop and roll” until the fire is out.
- If you are in a room and cannot escape, leave the door closed, stay low to the floor and hang a white or light-colored sheet outside the window.
- Be sure all family members are accounted for. If someone is missing, let the fire department know.

Do not smoke in the bedroom, on the couch or anywhere you might fall asleep while smoking.

Sleep with your bedroom door closed.

Make sure your house number is clearly visible from the street and that fire trucks can reach your home.

Have fire-fighting materials available: dry powder, fire extinguisher, heavy tarp or blanket, and water.
Floods

Floods are the most common and widespread of all natural disasters. If you live in an area where floods occur, you should know the following:

**What to do before a flood**

- Plan for evacuation including where you are going to go and the route you will follow.
- Prepare your home for a flood. Call your local building department or office of emergency management for information.
- Purchase flood insurance.
- Keep all insurance policies and a list of valuable items in a safe place.
- Take photos or a videotape of the valuables you keep in your home.
- Listen to your radio or television for reports of flood danger.
- Keep your car filled with gas.

**What to do after a flood**

- Wear gloves and boots when cleaning up.
- Open all doors and windows. Use fans if possible to air out the building.
- Wash all clothes and linens in hot water.
- Discard mattresses and stuffed furniture; they can’t be adequately cleaned.
- Wash dirt and mud from walls, counters and hard surfaced floors with soap and water. Disinfect by wiping surfaces with a solution of one cup bleach per gallon of water.
- Discard all food that has come into contact with floodwater. Canned food is alright, but thoroughly wash the can before opening.
- If your well is flooded, your tap water is probably unsafe. If you have public water, the health department will let you know—through radio and television—if your water is not safe to drink. Until your water is safe, use clean bottled water.
- Learn how to purify water. If you have a well, learn how to decontaminate it.
- Do not use your septic system when water is standing on the ground around it. The ground below will not absorb water from sinks or toilets. When the soil has dried, it is probably safe to again use your septic system. To be sure, contact your local health department.
- When floodwaters have receded, watch out for weakened road surfaces.

**What to do during a flood**

- Do not try to walk or drive through flooded areas. Water can be deeper than it appears and water levels rise quickly. Follow official emergency evacuation routes. If your car stalls in floodwater, get out quickly and move to higher ground.
- Stay away from moving water; moving water six inches deep can sweep you off your feet. Cars are easily swept away in just two feet of water.
- Stay away from disaster areas unless authorities ask for volunteers.
- Stay away from downed power lines.
- If your home is flooded, turn the utilities off until emergency officials tell you it is safe to turn them on. Do not pump the basement out until floodwater recedes. Avoid weakened floors, walls and rooftops.
- Wash your hands frequently with soap and clean water if you come in contact with floodwaters.
Hot Weather Precautions

Severe heat may cause illness or even death. When temperatures rise to extreme highs, reduce risks by taking the following precautions:

Hot weather precautions to reduce the risk of heat exhaustion and heat stroke

- Stay indoors and in an air-conditioned environment as much as possible unless you're sure your body has a high tolerance for heat.
- Drink plenty of fluids but avoid beverages that contain alcohol, caffeine or a lot of sugar.
- Eat more frequently but make sure meals are balanced and light.
- Never leave any person or pet in a parked vehicle.
- Avoid dressing babies in heavy clothing or wrapping them in warm blankets.
- Check frequently on people who are elderly, ill or who may need help. If you might need help, arrange to have family, friends or neighbors check in with you at least twice a day throughout warm weather periods.
- Make sure pets have plenty of water.
- Salt tablets should only be taken if specified by your doctor. If you are on a salt-restrictive diet, check with a doctor before increasing salt intake.
- If you take prescription diuretics, antihistamines, mood-altering or antispasmodic drugs, check with a doctor about the effects of sun and heat exposure.

If you go outside

- Plan strenuous outdoor activities for early or late in the day when temperatures are cooler; then gradually build up tolerance for warmer conditions.
- Take frequent breaks when working outdoors.
- Wear a wide-brimmed hat, sun block and light-colored, loose-fitting clothes when outdoors.
- At first signs of heat illness (dizziness, nausea, headaches, muscle cramps), move to a cooler location, rest for a few minutes and slowly drink a cool beverage. Seek medical attention immediately if you do not feel better.
- Avoid sunburn: it slows the skin’s ability to cool itself. Use a sunscreen lotion with a high SPF (sun protection factor) rating.
- Avoid extreme temperature changes. A cool shower immediately after coming in from hot temperatures can result in hypothermia, particularly for elderly or very young people.

If the power goes out or air conditioning is not available

- If air conditioning is not available, stay on the lowest floor out of the sunshine.
- Ask your doctor about any prescription medicine you keep refrigerated. (If the power goes out, most medicine will be fine to leave in a closed refrigerator for at least three hours.)
- Keep a few bottles of water in your freezer; if the power goes out, move them to your refrigerator and keep the doors shut.

Cover windows that receive morning or afternoon sun. Awnings or louvers can reduce the heat entering a house by as much as 80 percent.
Prepare Your Household for Emergencies

After a disaster, you and your family should be prepared to be on your own for at least three days. In some emergencies, such as an influenza pandemic, you may need to prepare for a week or more. Emergency response teams will be very busy and may not be able to provide immediate care to all who need it.

Before disaster strikes

- Choose a place for your family to meet after a disaster.
- Choose a person outside the immediate area for family members to contact in case you get separated. This person should live far enough away so he or she won’t be involved in the same emergency.
- Know how to contact your children at their school or daycare, and how to pick them up after a disaster. Let the school know if someone else is authorized to pick them up. Keep your child’s emergency release card up to date.
- Put together an emergency supply kit for your home and workplace. If your child’s school or daycare stores personal emergency kits, make one for your child to keep there.
- Know where the nearest fire and police stations are located.
- Learn your community’s warning signals, what they sound like and what you should do when you hear them.
- Learn first aid and CPR. Have a first aid kit, a first aid manual and extra medicine for family members.
- Learn how to shut off your water, gas and electricity. Know where to find shut-off valves and switches.
- Keep a small amount of cash available. If the power is out, ATM machines won’t work.
- If you have family members who don’t speak English, prepare emergency cards in English with their names, addresses and information about medications or allergies. Make sure they can find their cards at all times.
- Conduct earthquake and fire drills every six months.
- Make copies of your vital records and store them in a safe deposit box in another city or state. Store the originals safely. Keep photos and videotapes of your home and valuables in your safe deposit box.
- Make sure family members know all the possible ways to get out of your home. Keep all exits clear.
- Make sure all family members agree on an emergency plan. Give emergency information to babysitters or other caregivers.

During an emergency or disaster

- Keep calm and take time to think. Give assistance where needed.
- Listen to your radio or television for official information and instructions.
- Use the telephone for emergency calls only.
- If you are ordered to evacuate, take your emergency kit and follow official directions to a safe place or temporary shelter.

After the emergency or disaster is over

- Use caution in entering damaged buildings and homes.
- Stay away from damaged electrical wires and wet appliances.
- Check food and water supplies for contamination.
- Notify your relatives that you are safe. But don’t tie up phone lines, they may be needed for emergency calls.
- If government disaster assistance is available, the news media will announce where to go to apply.
Disaster Tips for People with Mobility Disabilities

Storage
- Store emergency supplies in a pack or backpack attached to a walker, wheelchair or scooter.
- Store needed mobility aids (canes, crutches, walkers, wheelchairs) close to you in a consistent, convenient and secured location. Keep extra aids in several locations, if possible.

Emergency supply kit
- Keep a pair of heavy gloves in your supply kit to use while wheeling or making your way over glass or debris.
- If you use a motorized wheelchair or scooter, consider having an extra battery available. A car battery can be substituted for a wheelchair battery, but this type of battery will not last as long as a wheelchair’s deep-cycle battery. Check with your vendor to see if you will be able to charge batteries by either connecting jumper cables to a vehicle battery or by connecting batteries to a specific type of converter that plugs into your vehicle’s cigarette lighter in the event of loss of electricity.
- If your chair does not have puncture-proof tires, keep a patch kit or can of “seal-in” air product to repair flat tires, or keep an extra supply of inner tubes.
- Store a lightweight manual wheelchair, if available.
- Make sure furniture is secured so that it doesn’t block the pathways you normally travel.

- If you spend time above the first floor of a building with an elevator, plan and practice using alternative methods of evacuation. If needed, enlist the help of your personal support network.
- If you cannot use stairs, discuss lifting and carrying techniques that will work for you. There will be times when wheelchair users will have to leave their chairs behind in order to safely evacuate a structure.
- Sometimes transporting someone down stairs is not a practical solution unless there are at least two or more strong people to control the chair. It is very important to discuss the safest way to transport you if you need to be carried, and alert helpers to any areas of vulnerability. For example, the traditional “firefighter’s carry” may be hazardous for some people with respiratory weakness.
- Be prepared to give helpers brief instructions on the best way to move you.
Pandemic Flu

An influenza pandemic is a worldwide outbreak of a new flu virus

An influenza — or flu — pandemic is an outbreak of a new type of flu virus that spreads rapidly from one country to another. Because the virus is new, people have no natural immunity to it and vaccine will not be available for many months. Without vaccine or immunity, the virus passes rapidly from person to person. Hundreds of thousands in our country could get sick, and many could die.

There were three large flu pandemics in the 20th century – 1918, 1957 and 1968. No one knows where or when the next flu pandemic will begin, but health officials agree that it is only a matter of time.

What to expect if an outbreak occurs

A flu pandemic could be devastating, so everyone should be prepared for the worst. With up to one-third of the workforce sick or staying home, supplies and services could be limited or disrupted.

Extraordinary measures could be required. You may be asked to stay away from other people, large public events like concerts or sports could be canceled, and schools could be closed. Health officials may issue orders to keep people with the virus at home or in special facilities. You may be asked to wear a mask in medical facilities or other public places.

A flu pandemic could last a long time. The 1918 flu pandemic lasted 18 months.

What to do now

- Know your neighbors. Encourage others to prepare.
- Be ready to help family and neighbors who are elderly or have special needs if services they depend on aren’t available.
- Know school policies about illness and absence. Make a plan for taking care of your children if schools are closed for long periods.
- Be ready to stay home from work when sick. Know work policies about sick leave, absences, time off and telecommuting.
- Encourage planning. Every workplace should have a plan for doing essential tasks if large numbers of employees are absent over many months.
- Explore ways to get your work done with less personal contact, such as increased use of e-mail and phone conferences.
- Be prepared to get by for a week or more on what you have at home. Stores may not be open or may have limited supplies.
- Plan to limit the number of trips you take to shop or to run errands.

Prevent the spread of germs

The flu virus is spread from person to person when an infected person coughs, sneezes or touches things that others use. To protect yourself and others:

- Cover your mouth and nose when you cough or sneeze. Cough into your sleeve or cover your mouth and nose with a tissue.
- Wash your hands. Soap and warm water are best, but alcohol-based hand gel or disposable wipes also work.
- Don’t touch your eyes, nose or mouth.
- Stay home when you’re sick or have flu symptoms. Drink extra water, get plenty of rest and check with a healthcare provider as needed.

Learn home-care basics

- Know how to care for someone with fever, body aches and lung congestion. During a pandemic, follow health officials’ instructions.
- Learn about dehydration. The flu virus causes the body to lose water through fever and sweating. Watch for weakness, fainting, dry mouth, dark concentrated urine, low blood pressure or a fast pulse when lying or sitting down. These are signs of dehydration. To prevent dehydration, it is very important for a person with the flu to drink a lot of water — up to 12 glasses a day.
Protect Your Pets
Consider your pets when planning for emergencies. Know where to take your pets in an emergency and remember their needs when creating your family preparedness kit.

Before the disaster
- Find a safe place for your pets to stay. Emergency pet shelters, animal control shelters, veterinary clinics or friends and relatives out of harm’s way are all possible choices. Some hotels and motels may allow you to bring pets; others may suspend their “no pet” rules during an emergency. Check ahead to make sure you can bring your pet.
- Make sure your pets wear current ID tags all the time, and that carriers for each pet are labeled with contact information.
- Make sure your pets are current on their vaccinations. Pet shelters may require proof of vaccines.

During a disaster
- Keep pets in the house as emergency situations develop so you can locate them.
- Don’t wait until the last minute to get ready. Warnings may be issued hours or days in advance.
- Pet shelters will be filled on a first-come first-serve basis. Call ahead to check availability. Bring the items in your pet’s emergency supply kit.

If you evacuate, take your pets
- If it’s not safe for you to stay in the disaster area, it’s not safe for your pets. Don’t leave animals inside your home, chained outside or roaming loose. They can easily be injured, lost or killed.
- If you leave, take your pet even if you think you’ll be able to come home in just a few hours.
- Leave early — if you wait for an evacuation order, you may be told to leave your pets behind.

If you don’t evacuate
- Keep your pets with you in a safe area of your home.
- Keep dogs on leashes and cats in carriers. Make sure they are wearing identification.
- Arrange in advance for a trusted neighbor to take your pets if you’re not home during an emergency. Be sure he or she is comfortable with your pets, knows where to find them and their supplies, and has your home key.

After the disaster
- Don’t allow pets to roam. Pets can get lost if familiar landmarks and smells are gone.
- For a few days, keep dogs on leashes and cats in carriers in the house. If your home is damaged, they could get out and become lost.
- Be patient with your pets. Start their routines as soon as possible. Be ready for behavioral problems. If problems continue, or if your pet is having health problems, talk to your veterinarian.

Emergency supply list for pets
Have everything ready to go. Store supplies in sturdy easy-to-carry containers. Include:
- Medications and medical records stored in a waterproof container, and a first-aid kit.
- Sturdy leashes and harnesses. A secure carrier large enough for your pet to stand comfortably, turn around and lie down. Add blankets or towels for bedding.
- Photos to help identify lost pets and prove ownership.
- Food and water for at least seven days for each pet.
- Bowls, cat litter, litter box and a manual can opener.
- Information on feeding schedules, medical conditions, behavior problems, and the name and number of your veterinarian.
- Pet beds and toys, if easy to bring.
- Newspapers, paper towels, plastic trash bags, grooming items and household bleach.
Power Outages

Power outages can cause a number of safety concerns; knowing the following information can help.

Before a power outage

- Register life-sustaining and medical equipment with your utility company.
- Consider buying a generator. When installing a generator, follow the instructions carefully. Keep your generator outside and run a cord inside. Don’t connect your generator to main service panels — it’s dangerous! Be sure to place a carbon monoxide detector indoors.
- Make sure your disaster preparedness kit contains light sticks, flashlights, a battery-powered radio with extra batteries and a wind-up clock.
- Have a corded telephone available — cordless phones will not work when the power is out.
- Have a safe alternative heat source and supply of fuel. Never burn charcoal or use a generator indoors.
- If you own an electric garage door opener, know how to open the door without power.

During a power outage

- Turn off lights and electrical appliances except for the refrigerator and freezer.
- Even if it is dark, turn light switches and buttons on lamps or appliances to the “off” position.
- Unplug computers and other sensitive equipment to protect them from possible surges when the power is restored.
- Leave one lamp on so you will know when power is restored. Wait at least 15 minutes after power is restored before turning on other appliances.
- Conserve water, especially if you use well water.
- Never use gas ovens, gas ranges, barbecues or portable or propane heaters for indoor heating—they use oxygen and create carbon monoxide that can cause suffocation.
- Candles can cause a fire. It’s far better to use battery-operated flashlights or glow sticks for lighting.
- Using a kerosene heater, gas lantern or stove inside the house can be dangerous. Maintain proper ventilation at all times to avoid a build up of toxic fumes, and be sure to have a carbon monoxide detector.
- Stay away from downed power lines and sagging trees with broken limbs.

Keep food safe

- Use and store food carefully to prevent foodborne illness when power outages make refrigeration unavailable.
- Use foods first that can spoil most rapidly.
- Keep doors to refrigerators and freezers closed. Your refrigerator’s freezer will keep food frozen for up to a day. A separate fully-loaded freezer will keep food frozen for two days.
- Use an ice chest packed with ice or snow to keep food cold. Buy dry ice to save frozen food. Do not handle dry ice with your bare hands. Use blocks or bags of ice to save refrigerator foods.
- Use caution if storing food outside during winter to keep it cold. The outside temperature varies, especially in the sun. Frozen food may thaw and refrigerator food may become warm enough to grow bacteria. Food stored outside must be secured from contamination by animals.

If in doubt, throw it out. Throw out meat, seafood, dairy products and cooked food that does not feel cold.

- Never taste suspect food. Even if food looks and smells fine, illness-causing bacteria may be present.
Prevent the Spread of Germs

Here are some simple tips to help keep respiratory infections and many other contagious diseases from spreading, especially during the cough, cold and “flu” season.

Respiratory infections affect the nose, throat and lungs; they include influenza (the “flu”), colds and pertussis (whooping cough). The germs (viruses and bacteria) that cause these infections are spread from person to person in droplets from the nose, throat and lungs of someone who is sick.

You can help stop the spread of these germs by practicing “respiratory etiquette,” or good health manners.

Here are some tips to help prevent spreading your germs to others, and to avoid catching someone else’s germs.

Keep your germs to yourself

- Cover your nose and mouth with a tissue when sneezing, coughing or blowing your nose.
- Discard used tissues in the trash as soon as you can.
- Always wash your hands after sneezing, blowing your nose, or coughing, or after touching used tissues or handkerchiefs. Wash hands often if you are sick.
- Use warm water and soap or alcohol-based hand sanitizers to wash your hands.
- Try to stay home if you have a cough and fever.
- See your doctor as soon as you can if you have a cough and fever, and follow their instructions. Take medicine as prescribed and get lots of rest.
- If asked, use face masks provided in your doctor’s office or clinic’s waiting room. Follow office and clinic staff’s instructions to help stop the spread of germs.

Keep the germs away

- Wash your hands before eating, or touching your eyes, nose or mouth.
- Wash your hands after touching anyone who is sneezing, coughing or blowing their nose.
- Don’t share things like towels, lipstick, toys, or anything else that might be contaminated with respiratory germs.
- Don’t share food, utensils or beverage containers with others.
Disaster Tips for People with Special Medical Needs

In a disaster, people with special medical needs have extra concerns. This information will help you and your family prepare for an emergency.

Medications

- Always have at least a three-day supply of all your medications. In some emergencies, such as an influenza pandemic, you may need to prepare for a week or more.
- Store your medications in one location in their original containers.
- Have a list of all of your medications: name of medication, dose, frequency, and the name of the prescribing doctor.

Medical supplies

- Have an extra three-day supply of any medical supplies you use, such as bandages, ostomy bags or syringes.

Electrically powered medical equipment

- For all medical equipment requiring electrical power — beds, breathing equipment, or infusion pumps — check with your medical supply company and get information regarding a back-up power source such as a battery or generator.

Oxygen and breathing equipment

- If you use oxygen, have an emergency supply (enough for at least a three-day period).
- Oxygen tanks should be securely braced so they do not fall over. Call your medical supply company regarding bracing instructions.
- If you use breathing equipment, have a three-day supply or more of tubing, solutions and medications.

Intravenous (IV) and feeding tube equipment

- Know if your infusion pump has battery back-up, and how long it would last in an emergency.
- Ask your home care provider about manual infusion techniques in case of a power outage.
- Have written operating instructions attached to all equipment.

Emergency bag

- In the event that you have to leave your home, keep a bag packed at all times that contains:
  - A medication list.
  - Medical supplies for at least three days.
  - Copies of vital medical papers such as insurance.

People who can help

- An important part of being prepared for a disaster is planning with family, friends and neighbors. Know who can walk to your home to assist you if no other means of transportation is available.
- Discuss your disaster plans with your home healthcare provider.
- Ask your local fire department if they keep a list of people with special medical needs; ask to be included if they do maintain a list.
- Keep a phone contact list handy of people who can help.
Prepare Your Vehicle for Emergencies

When planning for emergencies, don’t forget your vehicle: make sure your car, truck or van is in good working order, and keep an emergency supply kit handy.

Get your vehicle ready

- Keep an emergency supply kit in your vehicle.
- Prepare to be on your own for at least 24 hours.
- Write the date on all food and water stored in your kit. Replace items every six months.
- Keep food items in airtight plastic bags inside your kit.

Emergency supplies for your vehicle

- One gallon of water per person. Store water in large soft-drink containers.
- Avoid using containers such as milk cartons or glass bottles that will decompose or break.
- Emergency food. Avoid foods that will make you thirsty. Choose whole grain cereals and foods with high liquid content. Include food for infants and others with special diets.
- Small shovel, jumper cables, tow chain
- Road flare
- Battery-operated radio/extra batteries
- Flashlight and extra batteries
- ABC-type fire extinguisher
- Whistle
- Plastic storage bags
- Cash and change for phones
- A supply of vital medications
- Sturdy shoes, socks, work gloves
- Rain gear
- Mylar blankets, plastic shelter tarps
- Matches in a waterproof container
- Latex gloves (at least 2 pair)
- Map of the area (for locating shelters)
- Compass
- Games and books for kids
- Pet supplies
- Toilet paper, towelettes
- Feminine and personal hygiene items
- Infant diapers and wipes

Driving in difficult conditions

- Drive with your headlights on.
- Fill the fuel tank before entering open country. Stop to fill up long before the tank begins to run low.
- Don’t try to out-drive the conditions.
- Start early. Remember the posted speed limits are for dry pavement.
- Leave plenty of room to stop.
- Brake carefully. It takes more time to stop in adverse conditions.
- Look farther ahead in traffic than you normally do to gain extra time to safely react to situations.
- Drive cautiously near trucks.

Winter driving

- Be prepared with good winter tires, chains, a scraper, and a bag of sand for traction on ice.
- Carry extra winter clothing — the first rule of winter comfort and survival is to stay dry.
- Don’t use cruise control in wintry conditions. A brief touch of your brakes to deactivate the cruise control feature can cause you to lose control of your vehicle.
- Remember: A four-wheel drive vehicle can lose traction on ice just as easily as a two-wheel drive vehicle.
- Make sure your car is in good working condition. Check these:

  | Ignition system | Washer fluid |
  | Fuel system     | Tire tread/pressure |
  | Belts           | Defroster         |
  | Fluid levels    | Proper grade oil  |
  | Brakes          | Cooling system    |
  | Exhaust system  | Lights            |
  | Battery         |                   |
  | Antifreeze      |                   |
  | Wiper blades    |                   |
Disaster Tips for People with Visual Disabilities

Canes
- If you use a cane, keep extras in strategic, consistent and secured locations at work, home, school and volunteer site to help you maneuver around obstacles and hazards.
- Keep a spare cane in your emergency kit.

Alternative mobility cues
- If you have some vision, place security lights in each room to light paths of travel. These lights plug into electric wall outlets and light up automatically if there is a loss of power. They will, depending on type, continue to operate automatically for 1 to 6 hours. They can also be turned off manually and used as a short-lasting flashlight.
- Store high-powered flashlights with wide beams and extra batteries.
- Plan for losing the auditory clues you usually rely on after a major disaster.

Service animals may become confused, frightened or disoriented during and after a disaster. Keep them confined or securely leashed or harnessed. A leash/harness is an important item for managing a nervous or upset animal. Be prepared to use alternative ways to negotiate your environment.

Label supplies
- If helpful, mark emergency supplies with large print, fluorescent tape or Braille.

Secure computers
- Anchor special equipment and large pieces of furniture such as computers and shelving. Create a computer back-up system for important data and store it off site.

Advocacy issues
- Advocate that TV news not only post important phone numbers, but also announce them slowly and repeat them frequently for people who cannot read the screen.
Wildfires

Forest fires and wildfires threaten lives and destroy homes and natural resources. You can take action now that can help save lives and help prevent or reduce damage caused by wildfires.

What to do before a wildfire

- Have an evacuation plan. You may need to leave your home to go to a safe place.
- Know where you are going and the possible routes to get there.
- Designate a “safety zone” in case all evacuation routes are burning.
- If you have special physical or medical needs, be sure to have an ample supply of medication and supplies to take with you if you evacuate. People with heart and lung diseases must be especially careful around wood smoke. Discuss your emergency plans with your medical provider.
- Make emergency plans for your pets and livestock.
- Family members should have an out-of-area contact they can call to let them know they are safe when they are separated. Prepare wallet cards with the contact’s information.
- Put together a 72-hour emergency supply kit. Include water, food, protective clothing—sturdy shoes, cotton or wool clothing, long pants, long-sleeved shirt, gloves and a handkerchief. Store in easy-to-carry packs.
- Store copies of your vital records and lists, photos or videotapes of valuable items in a safety deposit box. Include insurance policies.
- Identify local radio and television stations. They will have the latest information about fires in your area.
- Prepare your home for a wildfire. Clearly mark all driveways with names/addresses. Remove firewood, shrubs and other combustibles away from the home. Call your local fire, forestry, or natural resources office, or go to www.lassenfiresafecouncil.org for more information.
- Talk to your neighbors about wildfire safety and working together during a wildfire.
- Always call your local fire department before burning. Be careful when cooking outdoors or using gas-powered equipment on dry, windy days.

When wildfire threatens

- Remain calm. Listen to the radio and television for fire reports and evacuation information. Follow the advice given by authorities. (However, if you feel threatened, do not wait to leave.)
- Tell family and friends you may need to evacuate and let them know where you are going. Use your out-of-area contact card.
- Pre-load your car with emergency supplies, vital records and other valuables. Face your vehicle in the direction of escape. Keep pets confined nearby.
- Put on protective clothing to protect your body, face and lungs.
- Prepare a note to post at your home that tells when you left and where you are going.
- Set up a ladder, garden hoses and sprinklers on the roof. To conserve water, wait until the embers start falling.

If advised to evacuate, do so immediately

- If there is time—close all windows, vents and doors, and remove lightweight curtains.
- Shut off gas utilities.
- Turn on your home lights.
- Lock your doors.
- Post your prepared note on main entrance.
- Choose a route away from fire hazards. Drive with your lights on and watch for emergency vehicles.
- If your evacuation route(s) are burning—go to your designated “safety zone.”
- **Do not attempt to re-enter the area until firefighters have declared it safe.**
Windstorms

Every fall and winter, windstorms cause extensive damage, including the loss of electricity throughout the Pacific Northwest. By taking action now, you can save lives and reduce the damage caused by windstorms and other weather-related hazards.

What to do before a windstorm

- Contact your local emergency management office or the National Weather Service to find out what types of storms are most likely to occur in your community.
- Assemble a disaster supply kit.
- If you have a home generator, make sure you know how to use it safely. Follow all instructions and contact the vendor, if necessary. Improper use of a generator can cause carbon monoxide poisoning.
- Find out who in your area might need special assistance, such as the elderly, disabled, and non-English speaking neighbors.
- Check with your veterinarian for animal care instructions in an emergency situation.
- If you live on a coastal or inland shoreline, be familiar with evacuation routes.
- Know what emergency plans are in place at your workplace, school and daycare center.
- Conduct a home safety evaluation to find out which nearby trees could fall in a windstorm.
- If you have an electric garage door opener, locate the manual override.

What to do during a windstorm

- Don’t panic. Take quick action to protect yourself and help others.
- Turn off the stove if you’re cooking when the power goes out, and turn off natural gas appliances.
- Never use a gas stove for heat.
- Never burn charcoal indoors.
- Never use a generator indoors or in a garage or carport.
- If you are indoors, move away from windows or objects that could fall. Go to lower floors in multi-story homes.
- If you are outdoors, move into a building. Avoid downed electric power lines, utility poles and trees.
- If you are driving, pull off the road and stop away from trees. If possible, walk into a safe building. Avoid overpasses, power lines and other hazards.
- Listen to your radio for emergency instructions.

What to do after a windstorm

- Check yourself and those around you for injuries.
- Evacuate damaged buildings. Do not re-enter until declared safe by authorities.
- Call 9-1-1 only to report a life threatening emergency.
- If you smell gas or hear a hissing sound indoors — open windows and leave the building. Turn off the gas source and call your gas company. Do not use matches, candles, open flames or electric switches indoors.
- If the power goes out, keep refrigerator and freezer doors closed to keep food frozen for up to two days.
- Provide assistance to your neighbors, especially the elderly or disabled.
- Try to make contact with your out-of-area phone contact, but avoid making local telephone calls.
- Monitor your portable or weather radio for instructions or an official “all clear” notice. Radio stations will broadcast what to do, the location of emergency shelters and medical aid stations, and the extent of damage.
Preparing for Winter Storms

Winter storms can range from moderate snow over a few hours to blizzard conditions with blinding, wind-driven snow or freezing rain that lasts several days. The time to prepare is before the snow falls and ice forms.

Preparing for winter storms

- Listen to your radio or television for winter storm forecasts and other information.
- Prepare your home for cold weather. Install storm windows. Insulate outside walls, attics and crawl spaces. Wrap pipes, especially those near cold outer walls, or in attics or crawl spaces. Repair leaks in the roof, around the doors and in the windows.
- Have appropriate cold weather clothing available.
- If you have a kerosene heater, refuel your heater outside and remember to keep it at least three feet from flammable objects.
- Make sure your fireplace functions properly.
- Have rock salt and sand on hand for traction on ice.
- Fill your gas tank before the snow starts falling.

During a winter storm

- Wear several layers of loose fitting, light weight, warm clothing rather than one layer of heavy clothing. Wear mittens rather than gloves. Wear a warm, woolen cap.
- Do not drive unnecessarily.
- Reduce the temperature in your home to conserve fuel.
- Heat only the areas of your home you are using. Close doors and curtains or cover windows and doors with blankets.
- Use alternative heat methods safely. NEVER use a gas or charcoal grill, hibachi or portable propane heater to cook indoors or heat your home.
- Never use a generator indoors or in a garage or carport.
- Be careful when shoveling snow. Do not overexert yourself.
- Be sure to eat regularly. Food provides calories that maintain body heat.
- Watch for signs of frostbite and hypothermia — slurred speech, disorientation, uncontrollable shivering, stumbling, drowsiness and body temperature of 95 degrees Fahrenheit or less.
- If you become trapped outside, get out of the wind and stay dry. Build a lean-to or snow cave if nothing else is available. Do not eat snow; it will make you too cold.
- Bring your dogs and cats inside during cold weather.

In your vehicle

- Make sure someone knows where you are going. Stay on the main roads.
- If you must stop, remain inside the vehicle. Use a bright distress flag or your hazard lights to draw attention to your vehicle.
- If trapped in a blizzard, clear your tail pipe and run your engine and heater for 10 minutes every hour. Open your window slightly.
- During night hours, keep the dome light on in the car so rescue crews can see your vehicle.
- Keep an emergency kit in your vehicle. Include a three-day supply of water and non-perishable food that can be eaten without being cooked. Include a blanket or sleeping bag for each passenger, a flashlight, cell phone, shovel, sack of sand or kitty litter, booster cables, flare, coffee can with lid and toilet paper.
